Projects

PDF Converter [↗](#)

This application allows users to upload image files, recognize text using OCR (Optical Character Recognition), and generate a Word document with the recognized text formatted to look like handwriting.

GitHub User Search [↗](#)

The GitHub Search Users project is a web application that leverages the GitHub API to allow users to search for GitHub profiles. It provides a user-friendly interface for quickly finding and exploring GitHub users based on their usernames.

Clock App [↗](#)

"Clock App" is a React web application that combines geolocation and weather APIs to provide users with real-time weather information based on their location. The app dynamically changes background images to reflect the time of day and weather conditions, creating a visually engaging experience.

Interactive Card [↗](#)

Interactive Card v2 is a web application that allows users to customize virtual credit card designs. Users can choose from a selection of pre-designed cards, customize card details such as card number, name, expiration date, and security code, and preview the final design before downloading it.

Voice Recorder, [Link is here](#) [↗](#)

Developed a speech recognition web application using React and Next.js, enabling users to interact with real-time transcription features.

Implemented start/stop functionality for speech recognition and integrated browser compatibility checks.

Utilized the react-speech-recognition library for adding speech recognition capabilities.

Styled the application using Tailwind CSS for a modern and responsive design.

Collaborated with a team to ensure project requirements were met and delivered high-quality code.

Todo List App, [Link is here](#) [↗](#)

The React To-Do List App is a simple and intuitive web application designed to help users organize and manage their tasks efficiently. Built with React.js, the app provides a clean and responsive interface for creating, updating, and deleting tasks.

Courses

JavaScript Algorithms and Data structures, *FreeCodeCamp*

React JavaScript, TypeScript, *BitCamp*
